

Job Description

About SalaryBox

It's an amazing time to be joining SalaryBox as we continue to transform attendance and payroll for over 60 million MSME's in India. We launched the app in Jan 2021, and now have more than 4 million downloads of the app. Backed by Y-Combinator, SalaryBox is India's leading attendance and payroll app. Considered to be the engine of economies around the world, the MSME segment in India alone has ~63 million units, and employs ~100 million people. The sector accounts for 27% of GDP and is crucial to the functioning of the economy. We are on a mission to make work easier for these business owners, managers, and employees so that they can focus on the things they do best. Today, SalaryBox is a fun bunch of analytical and ambitious folks building the first-of-its-kind technologies for the MSME ecosystem. Our mission is big, so we act with urgency in everything we do. We find creative ways to test ideas and learn today so that we focus on the right things tomorrow.

We are looking for a candidate who is willing to work with an early-age startup and help us grow. You will be working with an agile team where your ideas have the potential to reach millions. You will be an integral part of the organization where you will be a critical voice in the decision-making process.

About the Role

We are looking for a Full Stack Developer who enjoys building products end-to-end and solving complex engineering problems. We are technology-agnostic when it comes to programming languages and frameworks. What matters most is strong engineering fundamentals, product mindset, ownership, and the ability to learn and work across the stack.

Requirements

What You'll Do

- Build, ship, and scale end-to-end product features across frontend and backend.
- Work closely with Product and Engineering teams to convert requirements into reliable and scalable solutions.
- Take ownership of features from technical design and development through testing, deployment, and iteration.
